"HE'S GOT ENOUGH STHRAW VOTES TO STUFF ALL TH' CARPETS IN INDYANNY."

WHAT THE "YELLOW PERILS" OF THE FUTURE ARE

WILLIAM ARCHER, the Critic and Essayist, Says the Japanese Child Is Going to Be Formidable When He Grows Up, Not Only Because of His Training, But Because There Are So Many of Him-But He Gives Reasons for Believing That American Children Have Nothing to Fear From Their Yellow Cotemporaries When They Grow Up-Archer Is Now Traveling in Baluchistan and Studying Conditions There.

BY WILLIAM ARCHER.

of children. ind, paradise or no, the country of children it may well be called. The first thing that strikes the newly arrived traveler is the amazing quiverfulness of the country. In city, in village, in hamlet, wherever you go, chil-

iren seem to swarm out of the earth or naterialize from thin air. The foreigner omes to feel like a Pied Piper of Hamehn, so preternatural is his attraction for the little folk. He cannot stop to make a purchase, and much less to take a photograph, without being surrounded by a crowd of from twenty to fifty childrenbullet-headed, close-cropped boys in the cotton kimonos, pretty little girls in bright-colored, often garish, gowns, with still brighter or more garish sashes (obj). Almost all the girls, moreover, and some of the boys are certain to be car-Ting smaller children strapped to their backs. I have seen a little girl of ten plodding along with the heads of two ten children in Japan for every one that would not allow me to buy him off, and times relying on one's ignorance of their other oriental regions?

"yellow peril" in a new allegorical pic-

What are the merits of the education they receive? On this point it is difficult for one who knows no Japanese to form an opinion. Though the schoolmasters are badly underpaid, the elementary teaching is probably quite good. In spite of the appalling difficulty of learning to read and write Japanese, with its Chinese diographs, helped out by two subsidiary "syllabaries" of some tifty characters apiece, it would seem that practically the whole younger generation may fairly be called literate. Certainly there is no country where the written and printed word is more prominent than in Japan. Inscriptions and placards, on stone, wood and paper, meet the eye at every

Popular newspapers abound and the book stores of the cities are piled with cheap magazines and other indications of a wide reading public. B. H. Chamberlain, himself a master of Japanese, goes the length of saying that the rapidity with which Japanese schoolboys learn to read and write proves that the most complicated system of notation presents little difficulty to a child if only he be caught young enough. Japanese authorities do not quite agree to this. I have heard a Japanese scholar describe the national method of writing as "diabolical." There can be little doubt, I think, that it places a serious nandicap on education. There was at one time a strong movement for adopting the Roman alphabet, but the difficulties seem to be very great, and the movement has declined with the general decline in enthusiasm for things European.

The fact remains that up to the level of the "three R's" the Japanese child is probably well educated. He can read, he can write, and, as for arithmetic, he can rattle the beads of his abacus with astonishing deftness. He is grounded in the official (and very mendacious) history of his country, and he absorbs ofmorality from an ethical text-

It is said that if a schoolhouse caught fire and the master failed to save the portraits of the

imperial train in which the late mikad was traveling. No accident occurred nor ly killed himself. The point of the anectiously expressed the opinion that this act of expiation was rather excessive. Whereupon he was promptly boycotted and, I understand, compelled to resign his post. To such extremes is emperor worship carried.

It may seem, then, that all I have said goes to show that the Japanese are an extremely formidable people. They are prolific, well educated, intelligent and united in a self-sacrificing religion of patriotism. They have also given ample roof that they are good fighters, both by land and sea. Does it not appear that other nations, whose coast lines front the Pacific may well regard them with dis-

I do not think so, for various reason; which must be very briefly stated. In the first place, the natural resources of the Japanese are very scanty. It is in reality a poor country, ill-fitted to bear the strain of a great war, waged at a ditance from its own shores. I do not believe that its statesmen are mad enoug' to contemplate aggression upon ti United States or upon any part of the British empire, so long as the British empire holds together.

If crushing disaster were to overtak the sea power of England, the case might be different; but even then it is difficult to conceive that whatever power succeeded to the command of the sea would permit the conquest of a white man's land by a yellow race. Secondly, I believe that as education and culture take firmer hold on the people they will gradually become less prolific. Already the cost of its natural boundaries. It may seek to turb us Anglo-Saxons.

In the third place, I do not believe that that fanatical aspect of Japanese patriotism is either healthy or durable. For defensive purposes it may be useful-the war with Russia was really defensive. gressive adventures, it might very likely receive a "nasty knock" that would shake the people's faith in their "divine" figure-head. The real "yellow peril" would arise if Japanese energy and cunning were to obtain control of the giant resources of China, but that is a contingency on which it would be premature to speculate.
